EDUCATION

B.Tech in Artificial Intelligence & Data Science

AISSMS Institute of Information Technology (IOIT)

Pune, India

2024 – Present (Expected 2028)

CGPA: 8.9 / 10

TECHNICAL SKILLS

DATA ANALYSIS

Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, Statistical Analysis, Hypothesis Testing

DATA VISUALIZATION

Interactive Dashboards, Streamlit, Matplotlib, Seaborn

LANGUAGES

Python, SQL, C++, HTML/CSS

LIBRARIES

Pandas, NumPy, Scikit-Learn

ML & MODELING

Supervised Machine Learning, Regression, Classification

TOOLS & PLATFORMS

Git, GitHub, Jupyter Notebook, VS Code, Vercel

ACHIEVEMENTS

- **LeetCode Badge:** Holder for consistent problem solving and algorithmic thinking.
- **District Handball:** Competitive player demonstrating teamwork and pressure management.

LANGUAGES

English (Professional), Hindi (Fluent), Marathi (Native)

PROFILE SUMMARY

AI & Data Science undergraduate with a strong foundation in exploratory data analysis (EDA), statistical modeling, and database querying. Skilled in Python (Pandas, NumPy, Seaborn) and SQL, with hands-on experience building interactive analytics dashboards and deploying predictive machine learning models. Adept at translating complex datasets into clear, actionable visual insights to support data-driven decision making.

DATA ANALYTICS PROJECTS

Student Analytics Dashboard

[GitHub Project](#)

- Designed and deployed an interactive performance dashboard in **Streamlit** to visualize academic records, attendance, and grade distributions.
- Conducted EDA on student records to discover correlation patterns between study habits, attendance, and final outcomes.
- Created dynamic charts using Matplotlib and Seaborn to communicate complex performance insights in a simplified layout.

Sales Prediction & Exploratory Analysis

[GitHub Project](#)

- Conducted comprehensive EDA on retail sales datasets to identify seasonal trends, promotional impacts, and customer patterns.
- Cleaned data, handled missing values, and engineered features in Python to train a regression model forecasting sales.
- Generated visualizations and analytical reports to communicate prediction intervals and key sales drivers.

Unemployment Trend Analysis

[GitHub Project](#)

- Analyzed regional unemployment rate datasets in Python to identify key spikes during economic transitions and seasonal shifts.
- Utilized **Pandas** and **Seaborn** to clean unstructured data and construct comparative charts across different states and periods.
- Prepared structured summaries outlining actionable insights on regional employment variations.

Fraud Detection – FinTech ML System

- Developed a supervised ML pipeline (Random Forest, Gradient Boosting) with Scikit-learn, handling class imbalance in transaction data.
- Conducted correlation analysis and EDA on transaction velocities and locations to isolate risk indicators.
- Evaluated precision, recall, and F1-score metrics to deliver data-backed fraud prevention recommendations.

LEADERSHIP & COLLABORATION

Technical Team Executive

Present

ACM Student Chapter, AISSMS IOIT

- Coordinated technical workshops and bootcamps, delivering data-driven updates during chapter reviews.
- Collaborated with team members to execute technical events, ensuring clear documentation of goals and milestones.

Technical Team Executive

2024 – 2025

IEEE Student Branch, AISSMS IOIT

- Organized technical seminars and managed event logistics to drive student engagement.
